

SCENE: 1

"Grandma needs insulin today. But I'm worried that if I take it to her, I'll get her sick."

SCENE: 2

During this pandemic, most of us have been flying blind when we go to work, shop or care for loved ones.

(add street noise if it doesn't distract)

SCENE: 3

Safe2 is changing that.

SCENE: 4

The FREE mobile app alerts you as soon as someone you've crossed paths with begins suffering COVID symptoms.

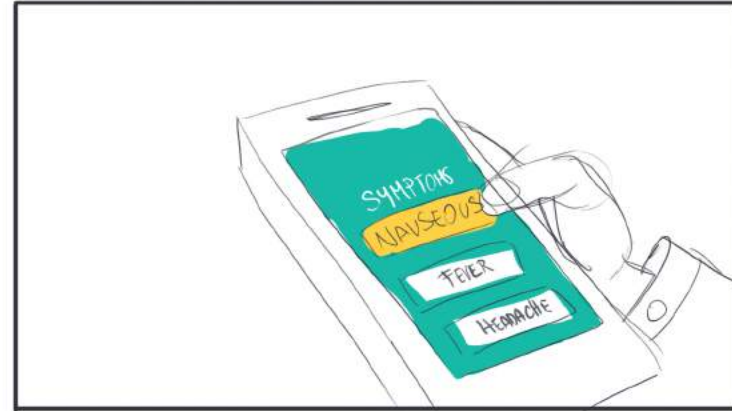

(bip,bip phone sound effect) when phone pings in scene 4 use sneeze or cough sound effect.

SCENE: 5

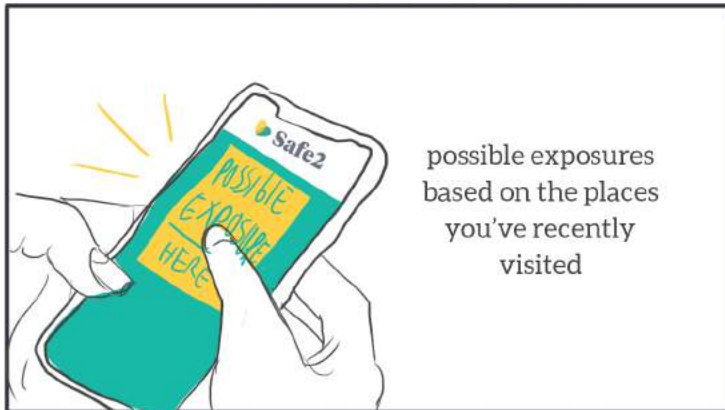

Once a day, tell the app how you're feeling.

SCENE: 6

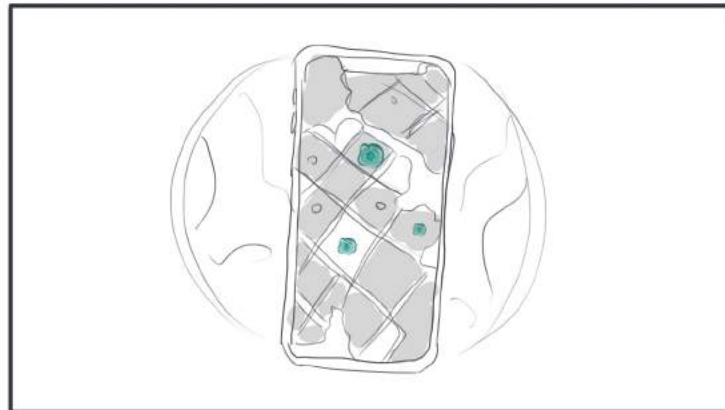

SCENE: 7

Then get notified of possible exposures based on the places you've recently visited.

(Phone sound effect alert)

SCENE: 8

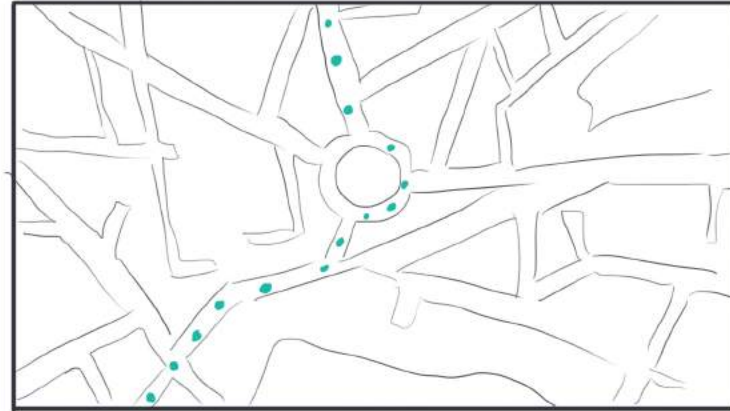

and warnings about COVID hot spots.

SCENE: 9

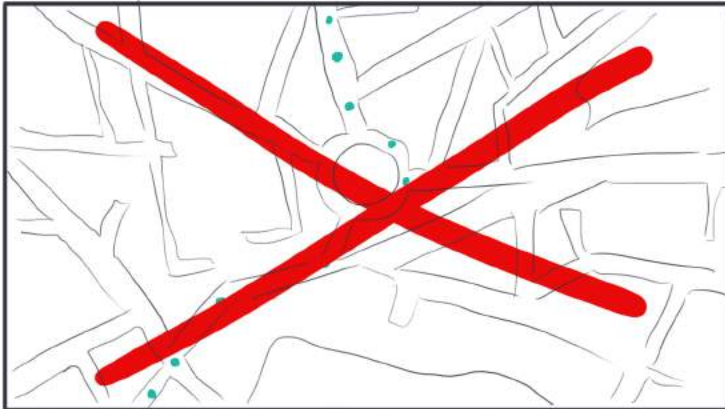

Built by a global volunteer team of disaster relief experts and privacy advocates, Safe2 is a COVID Exposure Warning System that only shares anonymous information. It doesn't store any

SCENE: 10

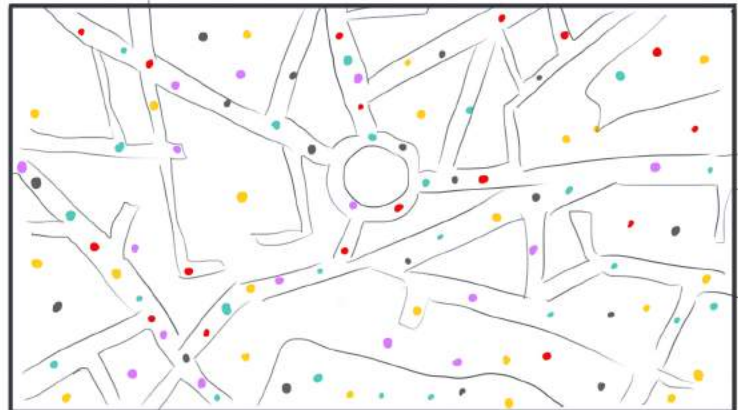

"ant trail" of your location history except on your own phone.
