We have broken down the SEO process into 9 easy steps. This ensures that we can develop a custom strategy that gets you where you need to go, and beyond.

COMPETITION RESEARCH

If someone ranks above you, it means they are doing something better than you.

So, we begin by analyzing the number 1 competitor in your niche to know exactly why they rank above you and how we can beat them.

WEBSITE CURRENT HEALTH ANALYSIS

Next, we scan your site's health for common issues that could be hurting your SEO. This includes site architecture, security, on-page, technical, mobile, and international SEO.

OFFSITE LINK BUILDING

Link building helps increase your web authority, relevancy, and popularity. It is a key part of any successful SEO strategy that involves getting other websites to link to yours.

Most experts agree that it is also one of the hardest parts of running a website, whilst one of the most rewarding when you get it right.

SETTING AND TRACKING GOALS

By setting clear goals as well as a well-defined path to achieving success, we can track the progress of your SEO results to ensure your website is moving in the right direction.

We use a wide range of online analytical tools to ensure that your main success drivers are effectively targeted.
